

An unsupervised model for 3D Mapping

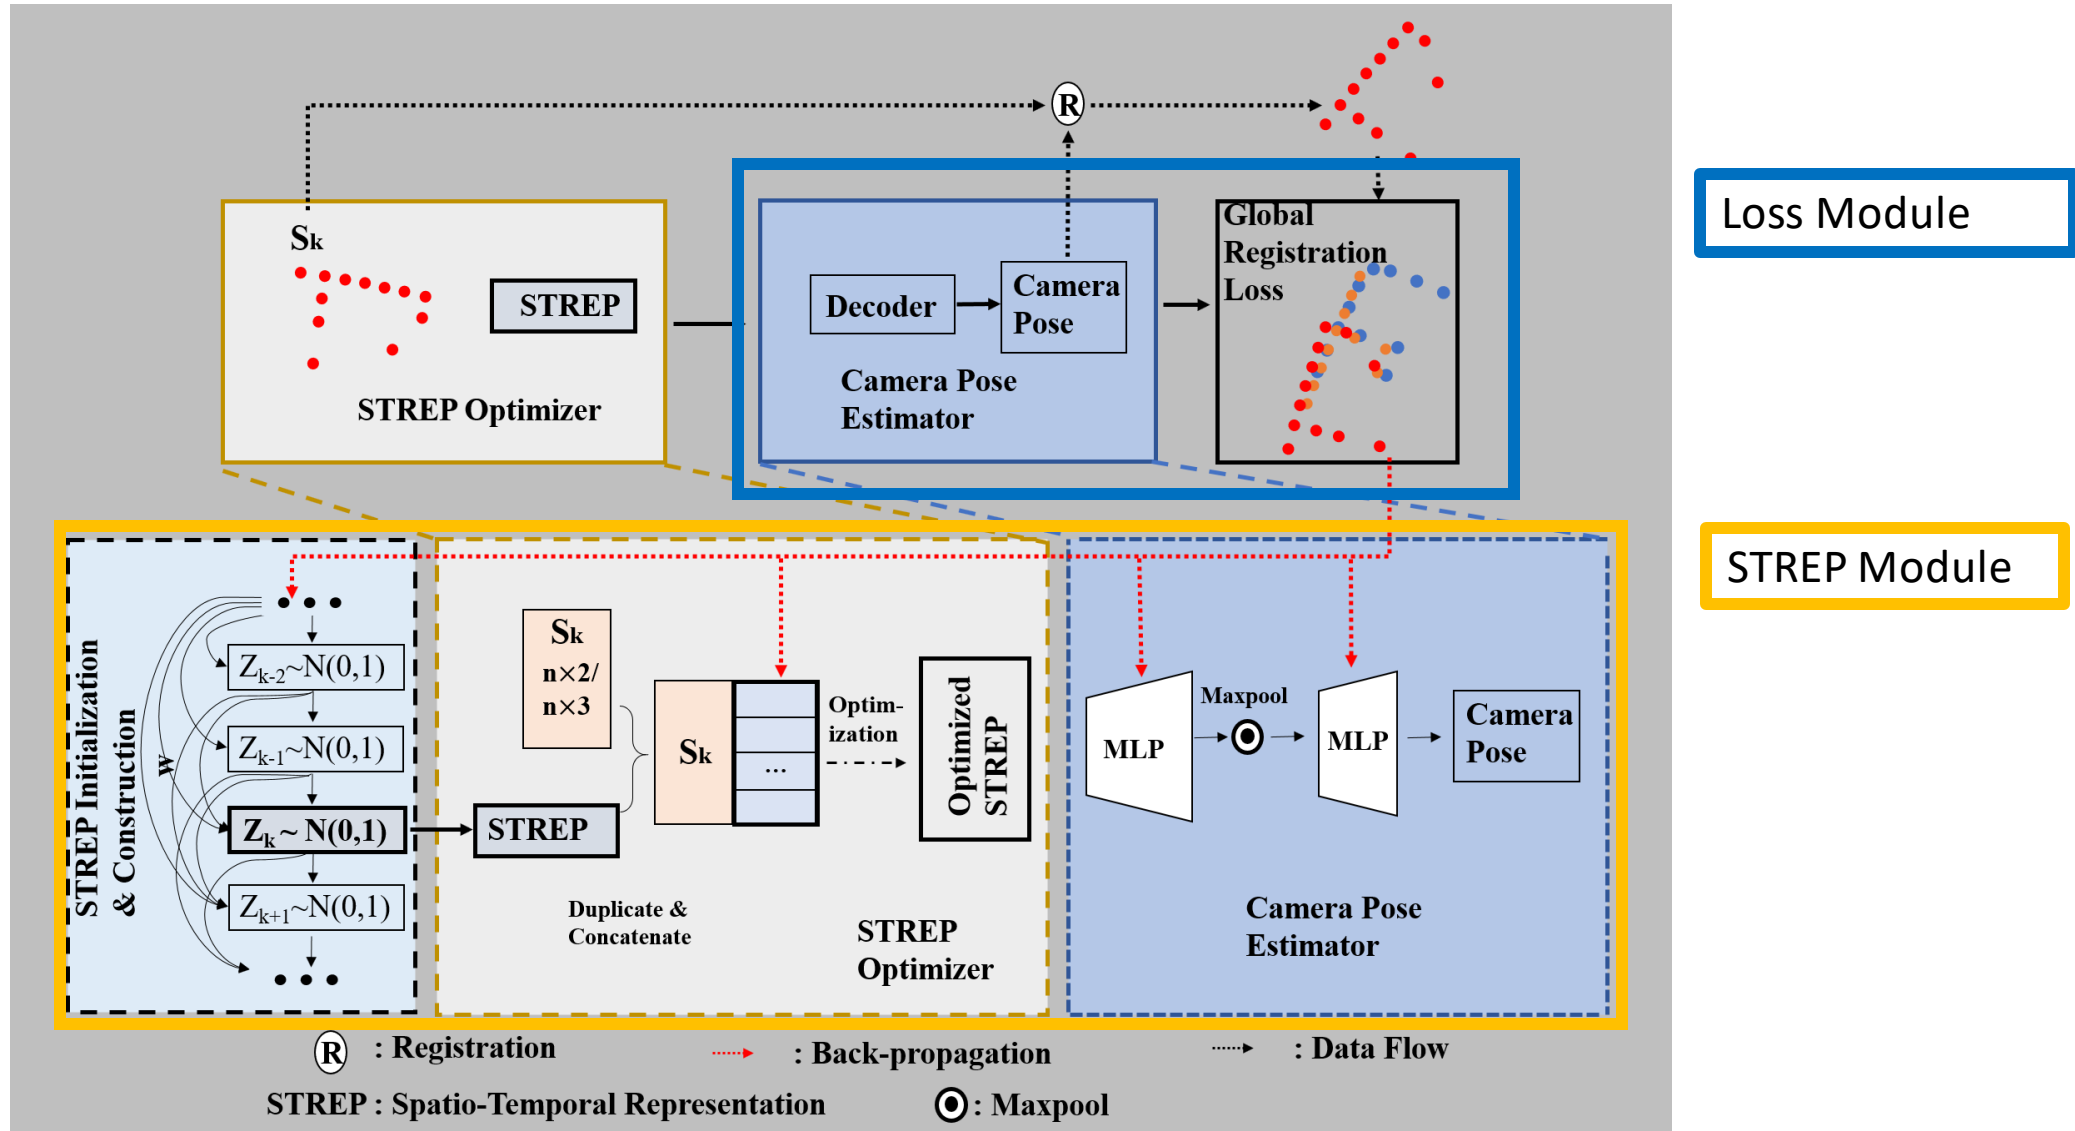

Yi Shi

**Project Instructor:
Prof. Yi Fang**

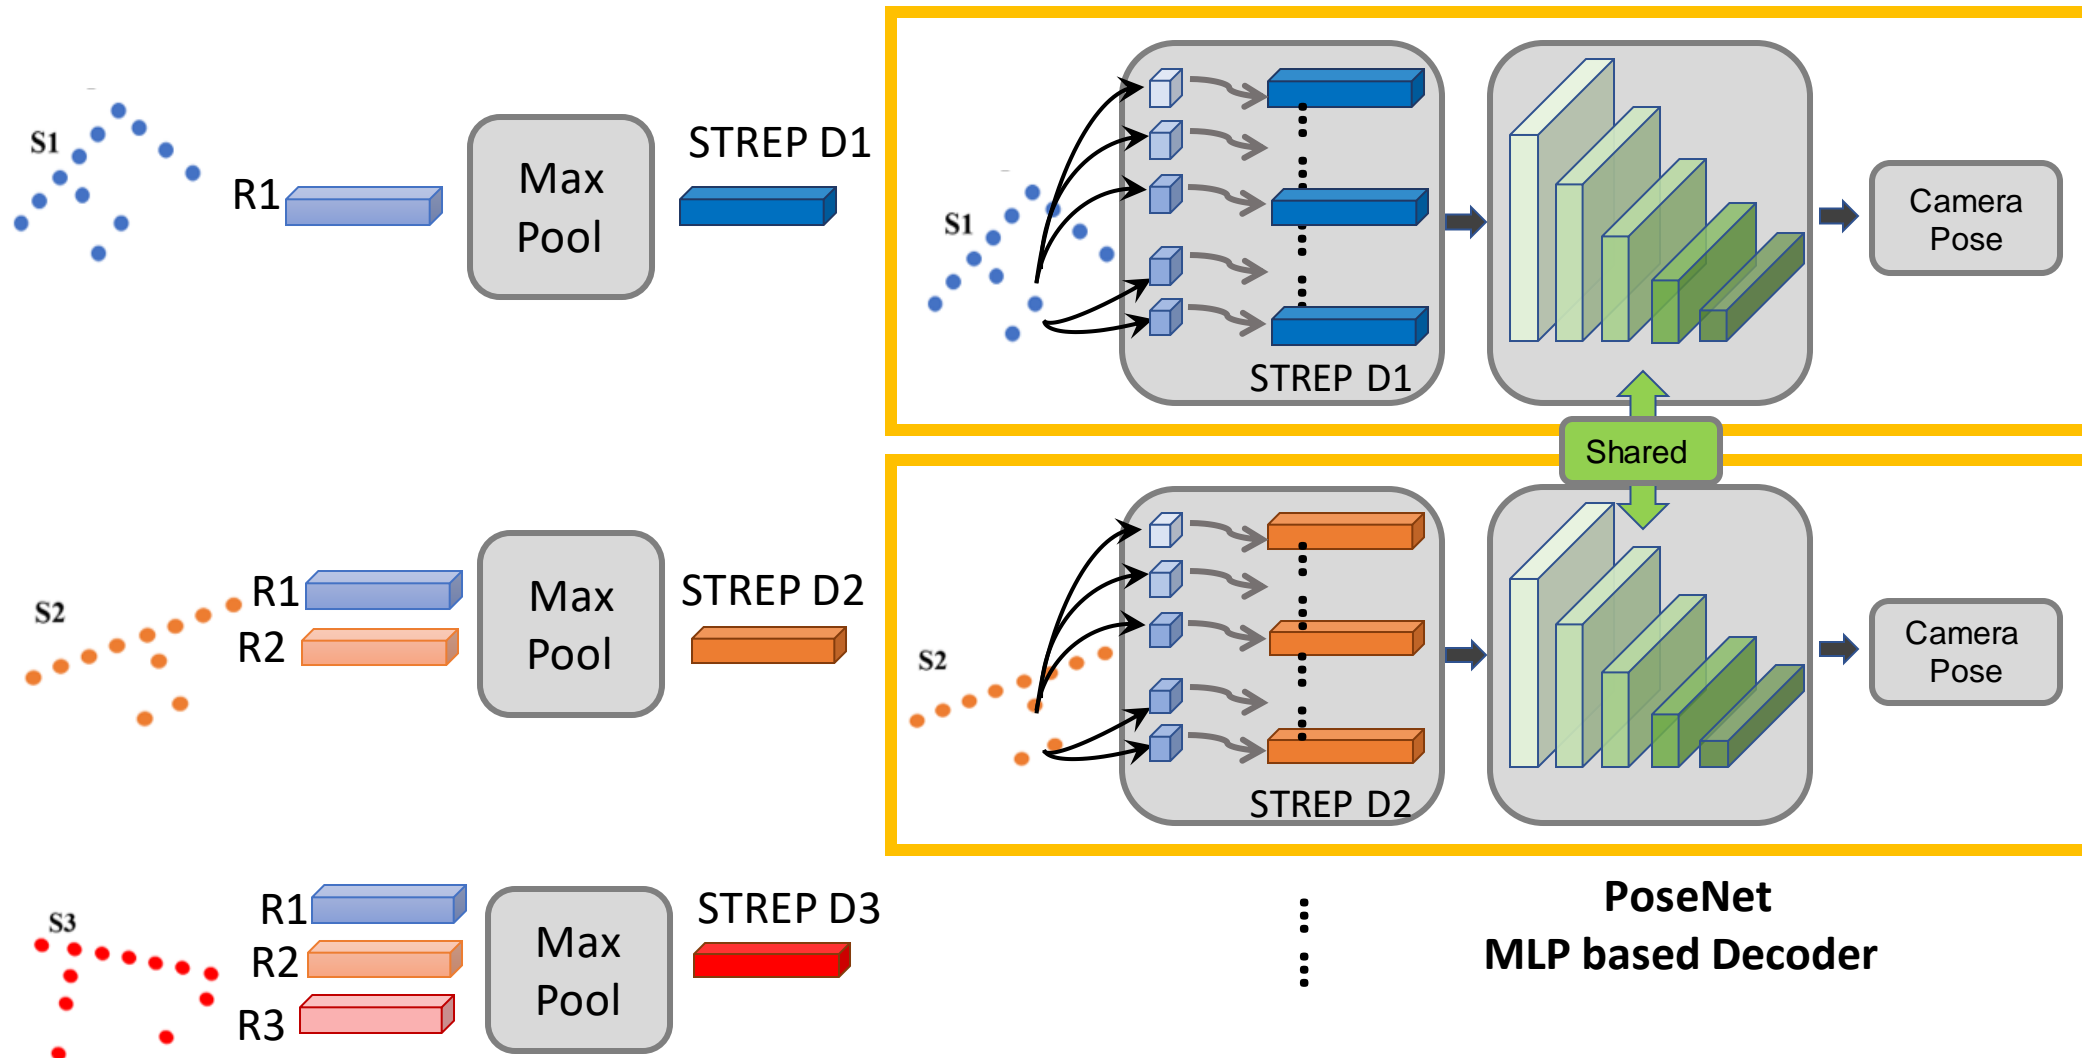

Project: Unsupervised 3D Mapping

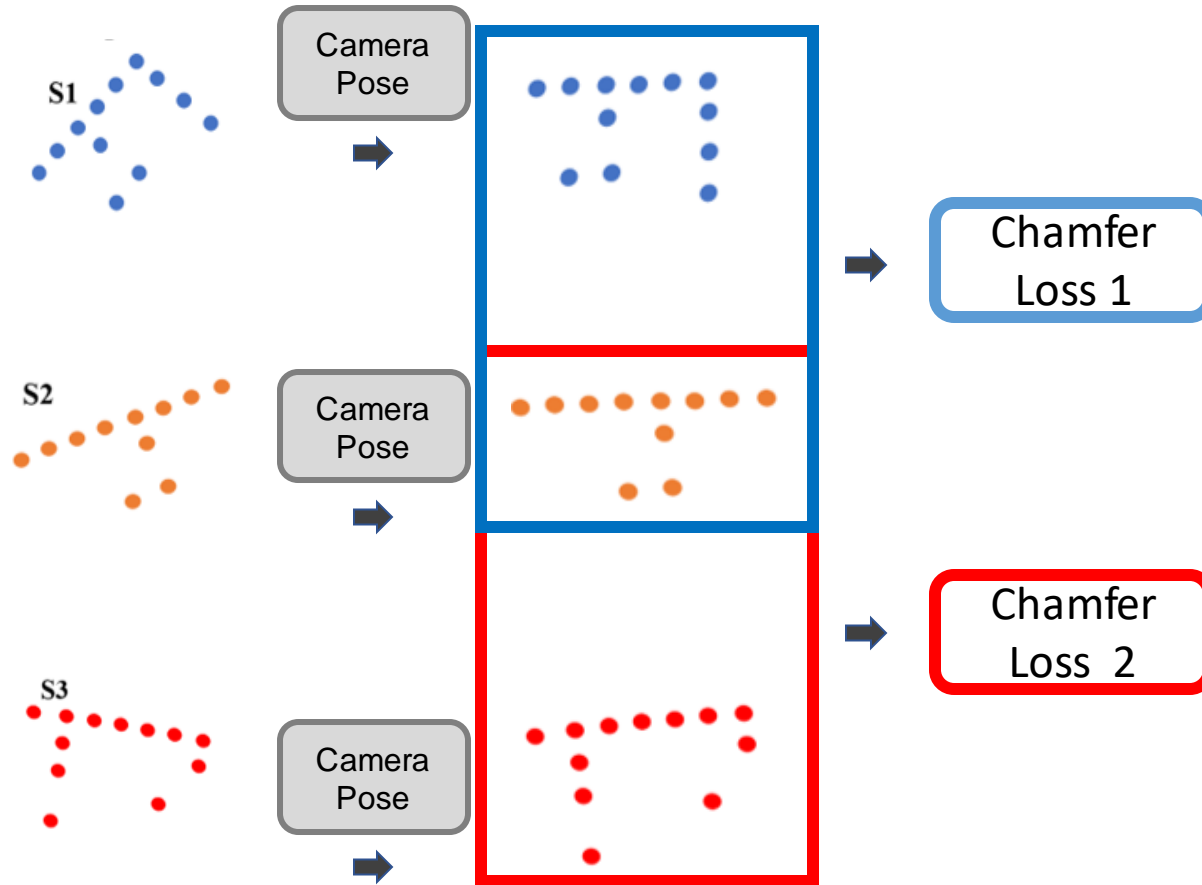

Unsupervised 3D Mapping : Pipeline

Unsupervised 3D Mapping: Spatial-Temporal Representation (STREP)

Unsupervised 3D Mapping: Local Pairwise Chamfer Losses

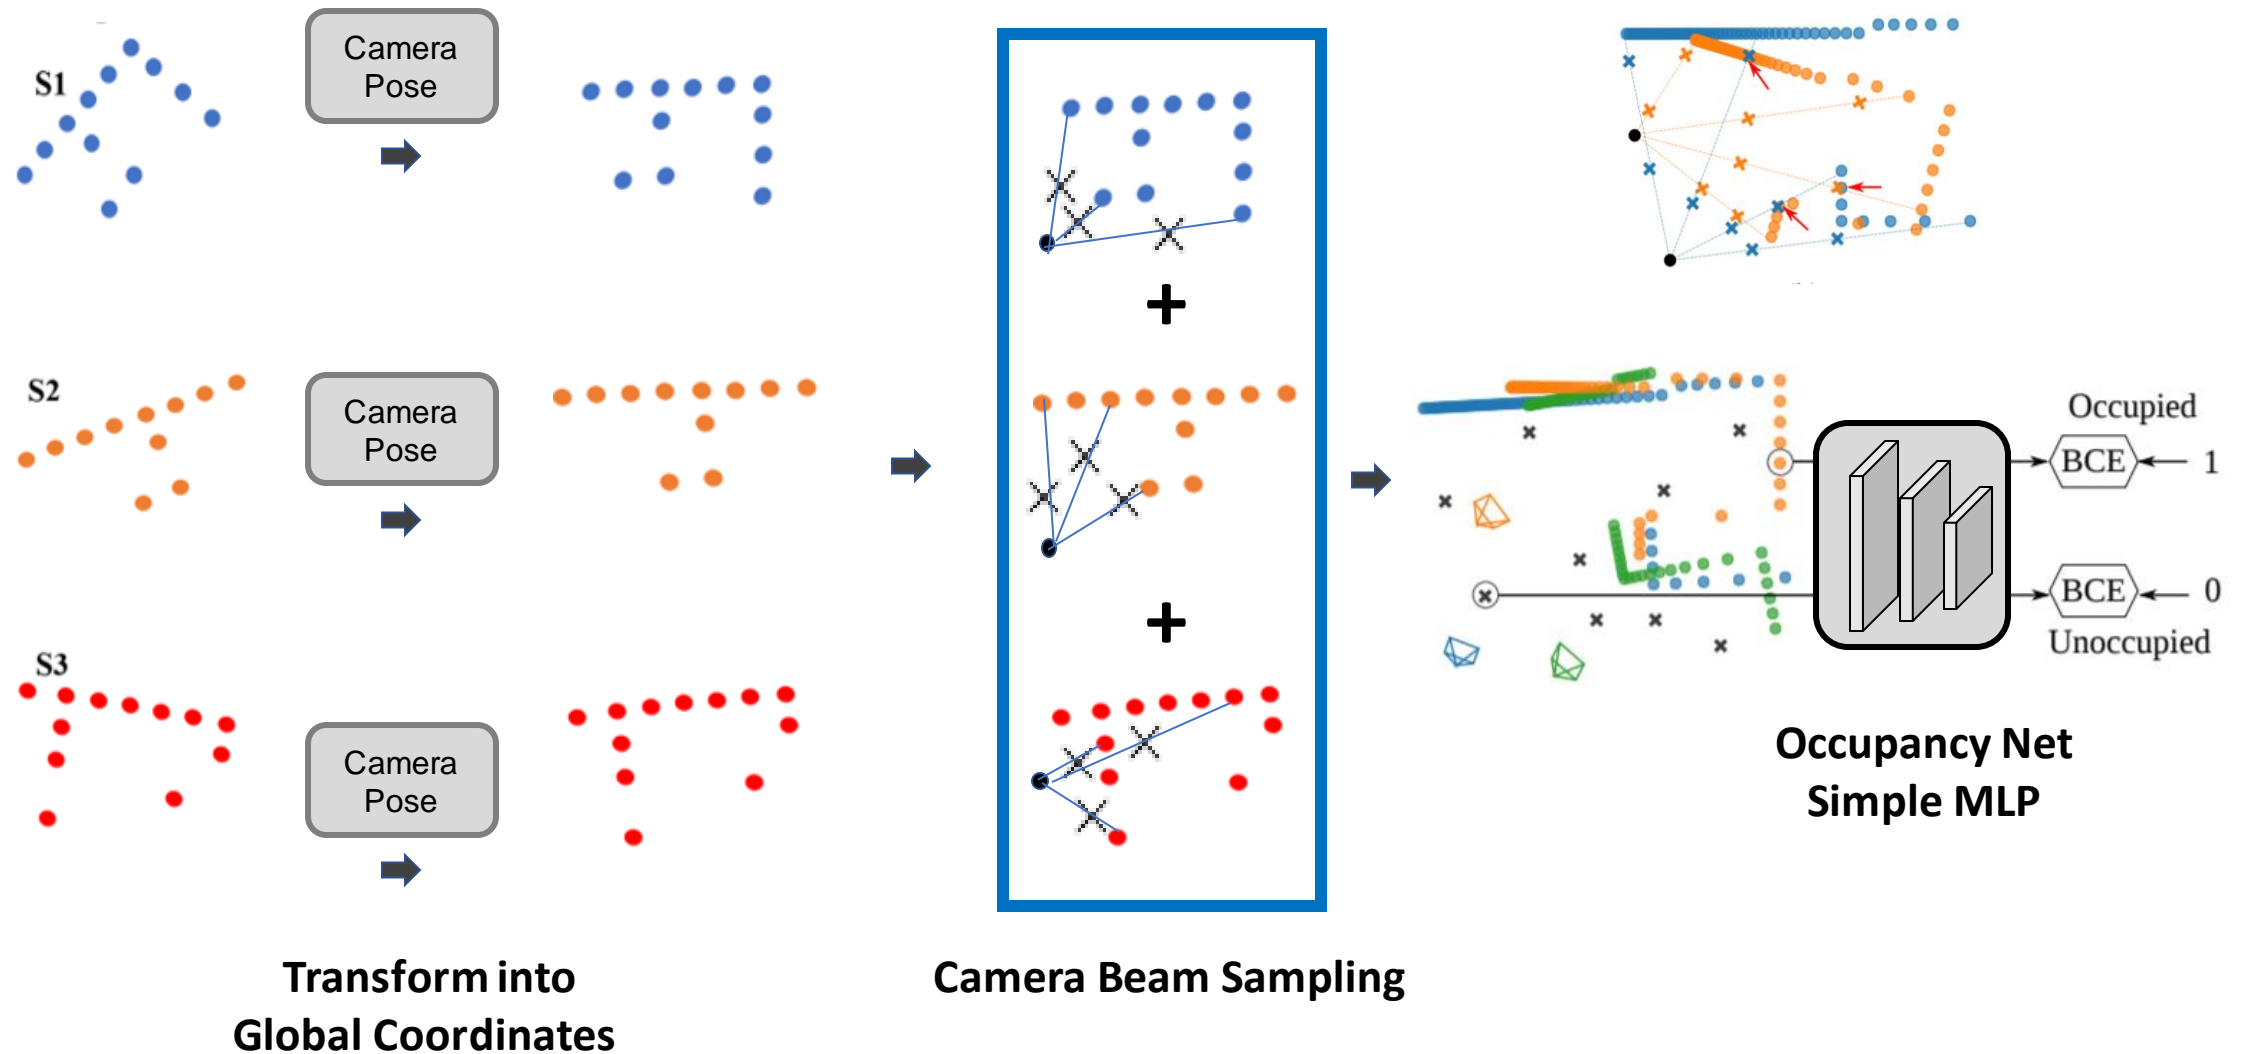

$$d_{CD}(S_1, S_2) = \sum_{x \in S_1} \min_{y \in S_2} \|x - y\|_2^2 + \sum_{y \in S_2} \min_{x \in S_1} \|x - y\|_2^2$$

Chamfer Distance

Transform with Predicted
Global Rotation Matrices

Unsupervised 3D Mapping: Global Self-Contradiction Loss

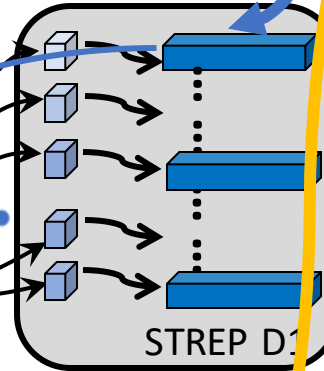

A One-Step Unsupervised Optimization Process.

Total Losses

R1

S1

STREP D1

Shared

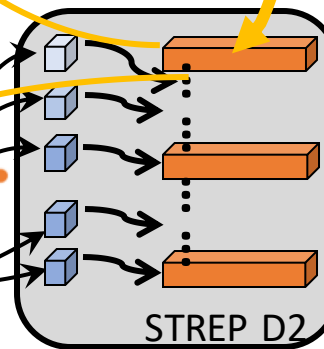

OccupancyNet

The Loss Reflects the degree of 'alignment' among a series of sequential point clouds.

R2

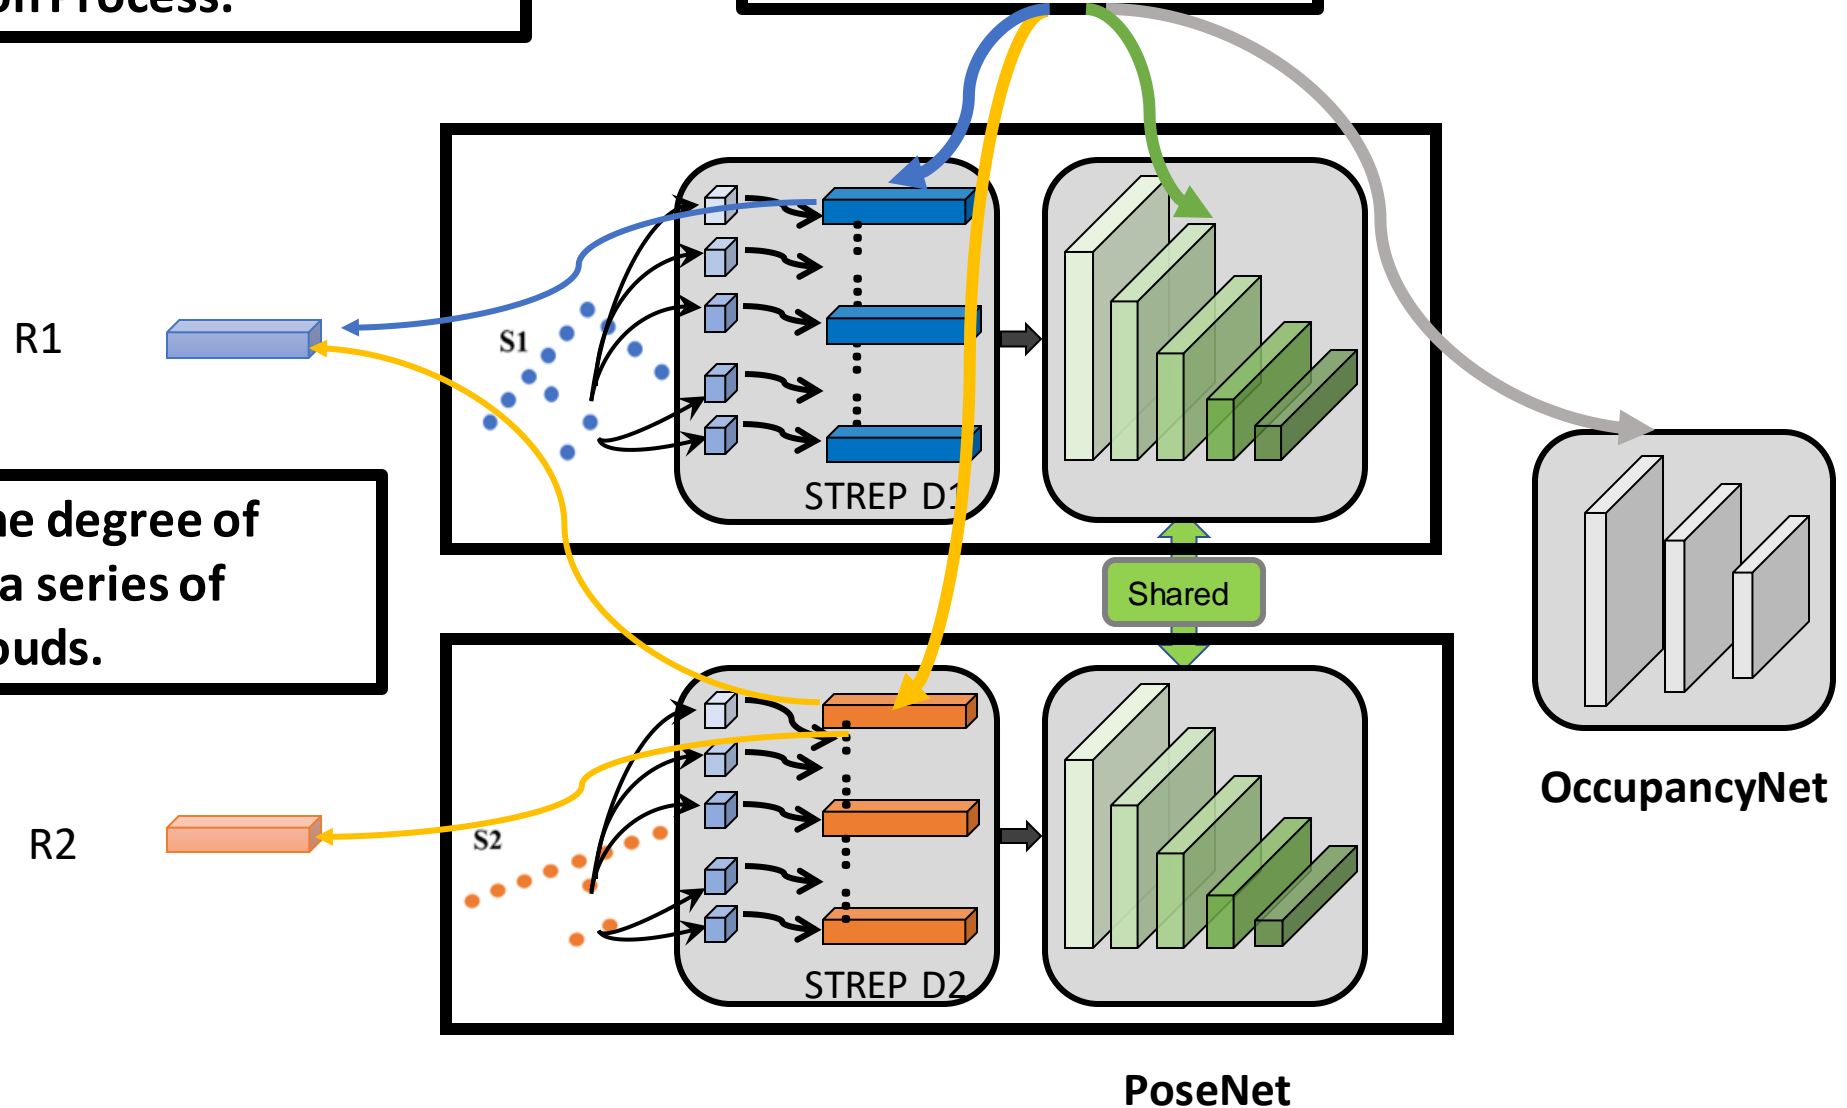

S2

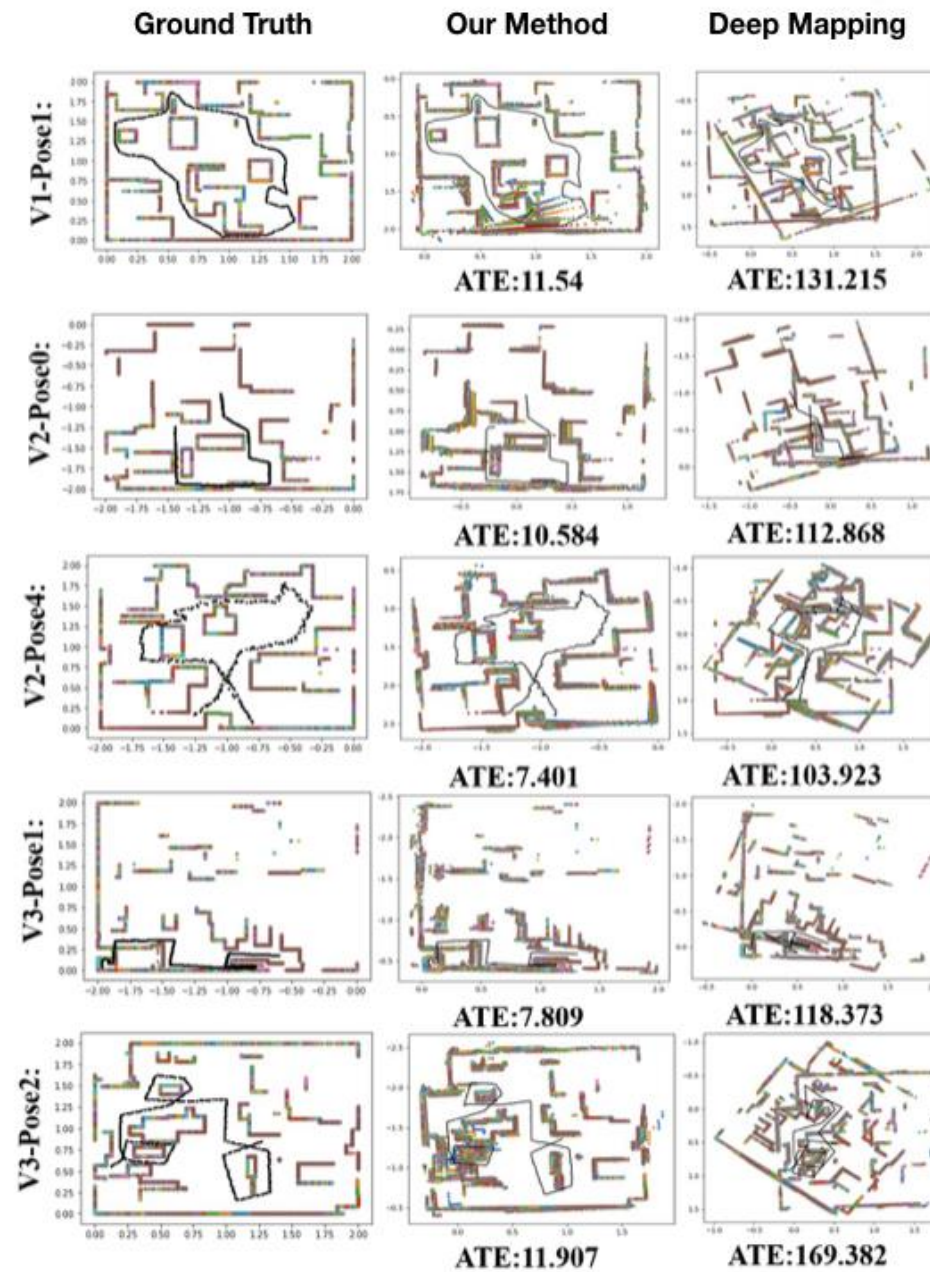

STREP D2

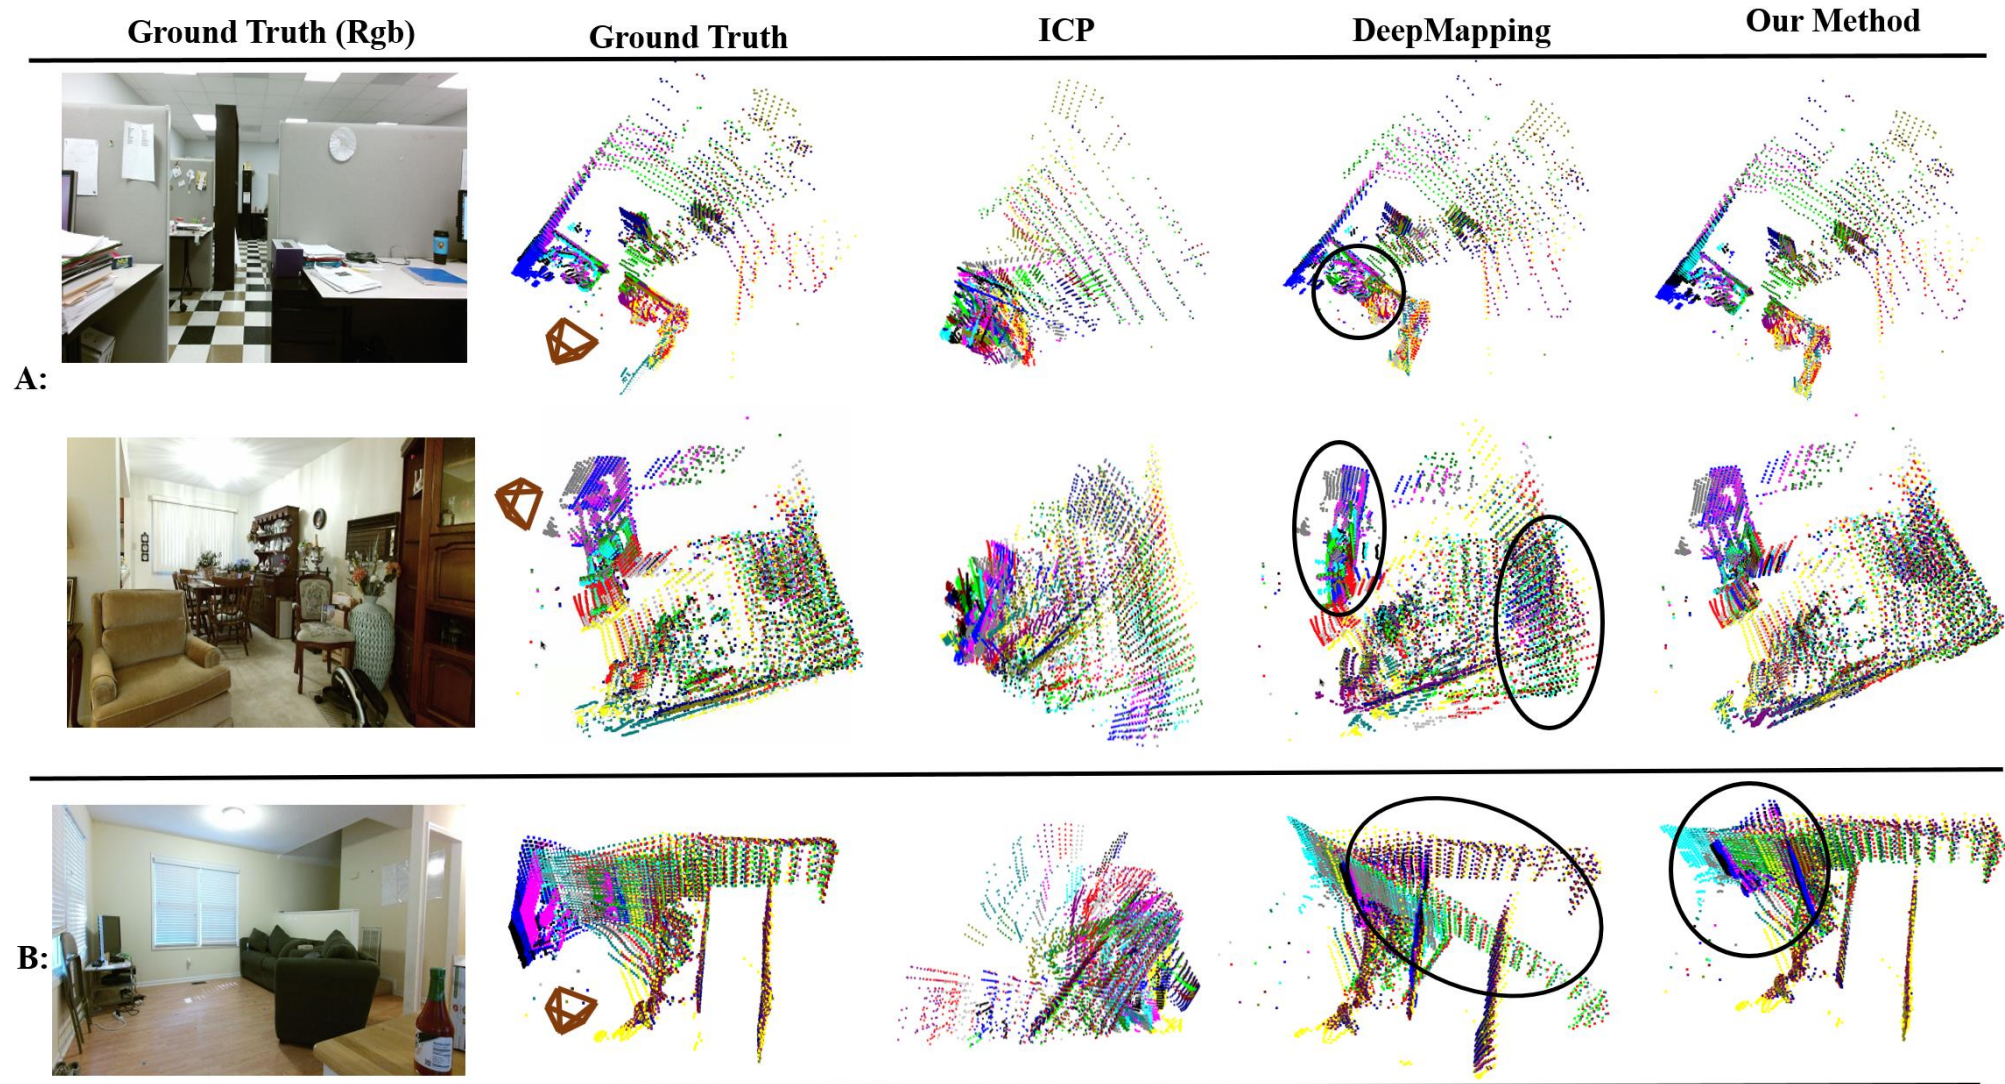

PoseNet

Unsupervised 3D Mapping: 2D Experiments

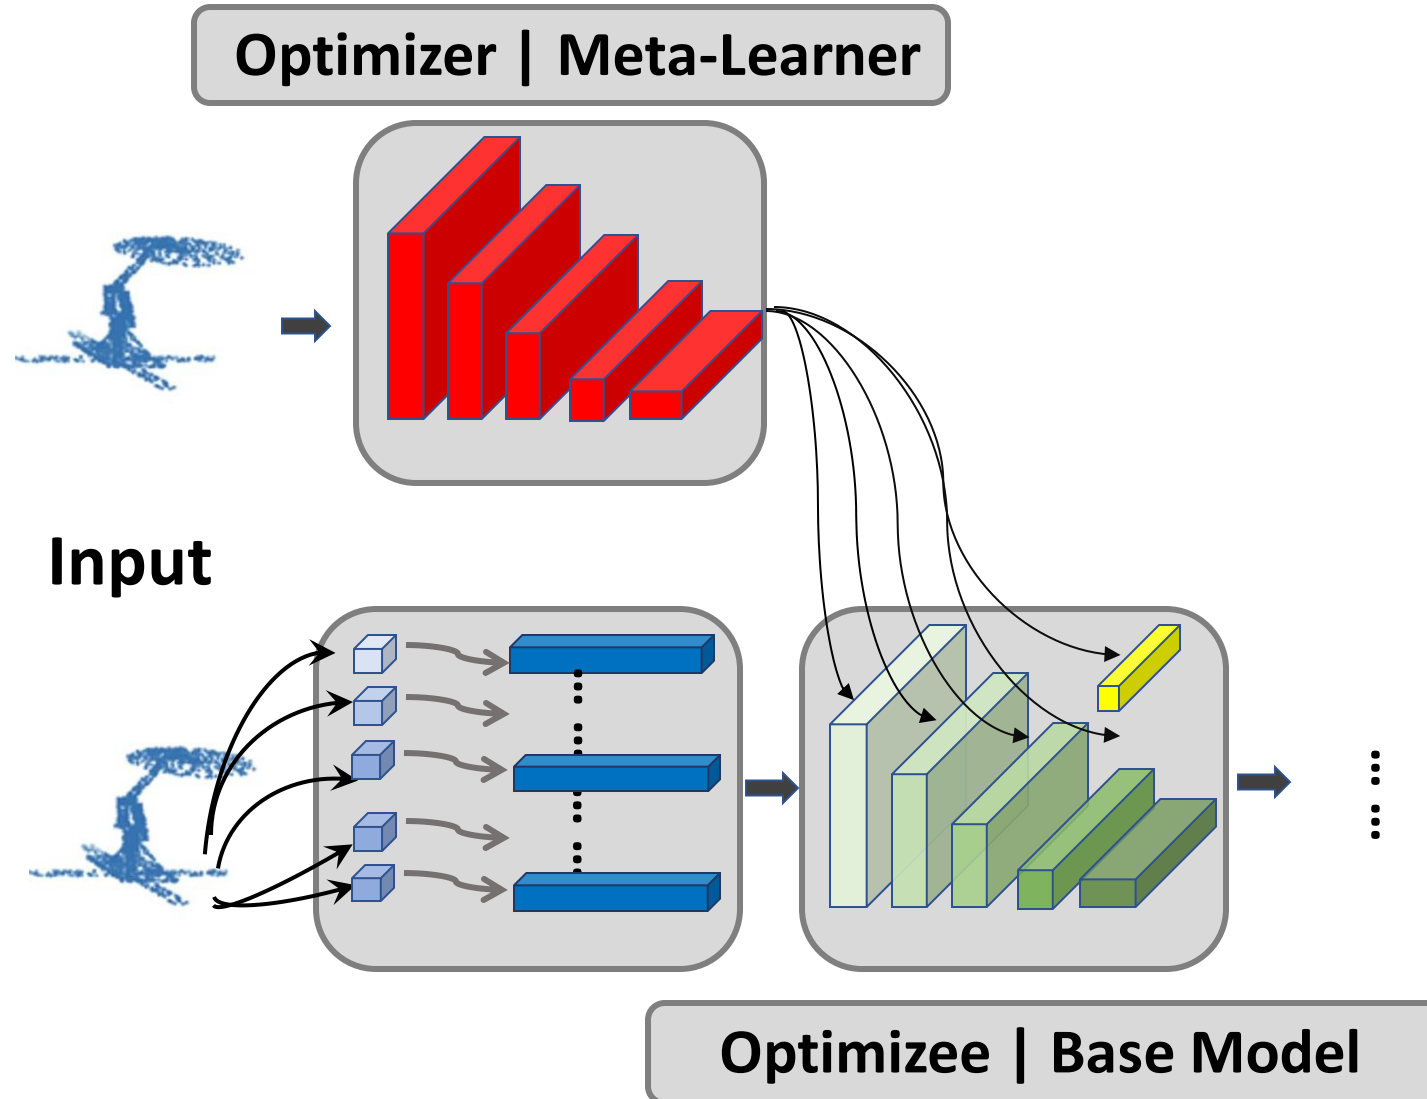

Unsupervised 3D Mapping: 3D AVD Dataset Experiments

:Camera pose for
taking the Rgb image

Future Studies: Meta Learning
